

**Team:** Santiago Macías Fernandez, Oscar Juanpablo Rivera León, Marco Rodrigo Campoy Mendoza

## Personal Devlog 2 - Prototype

### October 13, 2025

-Made the main structure for the website to support all the implementations to be made

-Investigated the needed technologies to use this midterm

-Planned out how to work out all the tasks

**Commentary:** It wasn't that hard

### September 16, 2025

-Implemented the API

-Implemented the Express server

-Investigated in how to deploy the site in Render

**Commentary:** Deciding an API to use was a big issue, also properly connecting everything up meant a challenge, even though we managed just well.

### September 17, 2025

-We verified everything

-Polished styling details

-Deployed the website

-Celebrated

**Commentary:** The website running on Render made us super happy and proud of ourselves.
