

Devlog 1 - Prototype

September 7, 2025

- First commit was made
- Both HTML files were initialized
- Visual resources were created and organized
- CSS files were created and linked to the HTML files
- We began to give the page its first appearance

Commentary: We had some issues on how to work as a team simultaneously in the same VS project and being able to see the changes made to the project. We also had some issues on how to push and pull repos from Github. All issues were resolved.

September 8, 2025

- We investigated how to use simple CSS animation tools to decorate the webpage
- We finalized the webpage's decoration
- We solved some minor issues

Commentary: We had a hard time animating the bubbles but we managed to achieve the effect at the end of the day. We learned some interesting CSS features.

September 9, 2025

- We tried to implement bootstrap
- We improved the format of the overall project
- Last commit until now was made

Commentary: We fixed some stuff and tried to implement bootstrap without external help and it was a total fail, we couldn't achieve to implement bootstrap properly without our website falling apart, so we leave it as it is.
