

**Team:** Santiago Macias Fernández, Oscar Juanpablo Rivera León, Marco Rodrigo Campoy Mendoza

Devlog – Oscar Juanpablo Rivera León

### **September 7, 2025**

- Get my part of the job.
- Both HTML files were initialized, so I gotta wait until the CSS of hel.html.
- Visual resources were created and organized. I installed an extension to do a collaborative work
- CSS files were created and linked to the HTML files. So I started to think what to do. Fortunately Rodrigo created some designs to get references.

**Commentary:** Honestly I did not do so much things. I take this time to rest and think what would be my next step.

### **September 8, 2025**

- We investigated how to use simple CSS animation tools to decorate the webpage
- We finalized the webpage's decoration
- We solved some minor issues

**Commentary:** The bubbles were a hell, It was difficult and took a lot of time, almost all day. Fortunately we managed to do it great and to apply it to the web page.
