Oscar Juanpablo Rivera León

Personal Devlog 2 - Prototype

October 13, 2025
-Investigated the proper usage of EJS files
-Turned HTML files into EJS files

Commentary: It wasn't that hard

September 16, 2025
-Prepared a new spot inside the "index.ejs" for the api to be integrated
-suggested some CSS changes

Commentary: The connection between the EJS and the api went well

September 17, 2025
-Verified that the webpage was stable, the server working properly and verified that the server functions had something to do with an error.

Commentary: The website seems to be working fine, minor tweaks were made.
